BT PowerCab

What's in the Box

Renor BT PowerCab
&
Power Cable

Powerful Bass, Dynamic Mids, Sparkling Highs

Customised state of the art drivers such as an 8" woofer & 1" silk dome tweeter work together to create the sonic signature.

Clarity & Detail

Achieved through our advanced acoustic architecture. Every element from the drivers, to the electronics and the even the shape is angled and placed in a specifically calculated manner.

Advanced EQ

Both analog and digital techniques are utilised. Dual ports improve overall bass response. Specialised circuit designs and digital signal processing combine to enhance the frequencies that naturally excel with the design.

Bluetooth aptX

Prevents any loss of quality during streaming. Maintaining a crystal clear signal path from source to output.

Exceptional Performance In Multiple Settings

From bedrooms and living rooms to gyms, dance studios and even conference halls. The BT PowerCab delivers in each environment.

Bring The Party Home

Who says you need to go to a club!

Great Sound, Great Times

Most of us have been listening to music on smaller devices lately. Unfortunately most small speakers compromise on sound quality in a number of ways. From adding artificial bass, producing lacklustre treble and changing the overall texture of the song dramatically by using too much digital compression. The BT PowerCab provides you with a high quality audio experience by allowing the resonant frequencies of your music to breathe naturally.

Built with the philosophy - **Sound Quality Comes First**

1 Year Replaceable Warranty : Covers manufacturing defects. Upon inspection a new unit will be shipped to you.
